HTML | CSS | JavaScript | GitHub | React | Node.js | Firebase | MySQL | jQuery | Bootstrap | Materialize | APIs | MongoDB

Development Experience

Freelance Web Developer

California State University - Northridge

Third largest University in the 23-campus California State University system

Apr '20 - Present

Los Angeles, CA

- Sole developer** for multiple studies performed by the Department of Psychology
- Faces in Social Context:** Study which involved gathering data from users as they ranked facial similarities between two images as well as various demographic data. Firebase was used for the database, and a Python script was created to parse the JSON data to a CSV file.
Technical skills used: HTML, CSS, JavaScript, Bootstrap, Firebase, and Python
- Harris Study variation:** Similar to the previous study with the addition of a survey to gather data about the user's knowledge of Kamala Harris and other political figures as well as user biases.
Technical skills used: HTML, CSS, JavaScript, Bootstrap, Firebase, and Python
- Positive Stereotypes:** Study which involved gathering mouse movements, coordinates, and time data from users as they choose between relevant positive stereotypes for the demographic pool they fall into. **Technical skills used:** HTML, CSS, JavaScript, Bootstrap, Firebase, and Python

Professional Experience

Sales Solutions and Analytics Specialist

Northstar Lottery Group

Private Manager for the Illinois Lottery

Apr '12 - Jan '18

Chicago, IL

- Analyzed annual business plan and retail network sales on a macro and micro level to create goals for the sales team
- Administered sales force automation tool for the sales team. Tasks included: coordinating update launches, providing training, testing, user support, quality assurance
